Description

Saga 34

The Saga 34 is a classic, heavily built fiberglass cruising sailboat modeled after traditional Scandinavian design (often styled as a Norwegian pilot cutter) and famous for its offshore capability.

Design and Build

- **Builder & Mold:** Originally molded by craftsmen like Charles Ward (with variations produced across different northern European yards such as Selje Bruk A/S).
- **Hull Construction:** Hand-laid fiberglass solid hull built to be stout and heavy rather than lightweight.
- **Keel & Rudder:** Full-length keel with a rudder attached to the trailing edge, giving it exceptional directional tracking and heavy-weather composure.
- **Length overall:** 38ft including bowsprit and pushpin.
- **Draft:** Around 1.68m to 1.78m (approx. 5.5 to 5.8 feet) depending on load.
- **Capsizing Screening:** Features a Capsizing Screening Formula (CSF) value of 1.52, meaning it meets standard metrics for ocean-racing and offshore approval (and has historically qualified for endurance events like the Golden Globe Race framework).

Sailing Characteristics

- **Handling:** Well-balanced and forgiving under sail, making it manageable for short-handed or solo voyagers.
- **Rig:** Typically configured with a simple, manageable masthead rig that keeps the sail plan low and reduces excessive heeling moments.
- **Motion at Sea:** Thanks to its heavier displacement and full keel, it offers a soft, predictable motion in a seaway rather than the choppy pound of lighter modern production boats.
